## OUR SERVICES

### PRIVATE CLOUD

ASP builds and manages a professional Server/networking/storage infrastructure at InterXion, one of the best datacenters in Belgium. We do: app modernization, multi-cloud, networking, anywhere workspace, security and cloud.

### WE ARE VEEAM

Store your backups independent of your location with Veeam Cloud Provider and keep your data in a good place. Veeam is a well-known product in the IT world for Backup & Replication.

### WE ARE DYNATRACE

The Dynatrace all-in-one platform provides answers, about the performance of your applications, their underlying infrastructure, and the experience of your end users. Dynatrace is used to modernize and automate enterprise cloud operations, release higher-quality software faster, and deliver optimum digital experiences to your organization's customers.

### WE ARE BOOMI

The 100% SaaS solution connects every service with Boomi. The platform supports 200+ connectors to almost any on premise or cloud application including: CRM, ERP, web services, social media and enterprise applications

### NETWORKING

Our networking solutions (including Ethernet, Optical, Wireless and Mobility), Security solutions and solutions for DataCenter are provided by Cisco and Dell. Equip yourself and get high-efficiency wireless.

### PUBLIC CLOUD

Do you need to design your ICT infrastructure? Our architects help you define the setup fitting best your needs, that is future prove whether this is on premise, in a datacenter, hybrid or completely in the cloud. ASP is your certified partner for any transition towards Azure. We have our own Express Route connection towards Azure.

**We aim to meet the  
needs of clients  
through exceptional  
service.**
